CODECLAN

Favourite bits of code

Check if array is empty and return false if not

```
def self.delete(id)
  if self.albums(id).length > 0
    return false
  end
  sql = "DELETE FROM genres WHERE id = $1"
  values = [id]
  SqlRunner.run(sql, values)
  return true
end
```

Check if the delete function returns true or false

```
post '/genre/:id/delete' do
  if Genre.delete(params["id"]) == true
    Genre.delete(params["id"])
    redirect to ('/genre')
  else
    erb :"genre/warning"
  end
end
```
